

## Ja Plonk Instructions

1> Erect the 3 sides of the game into a triangular shape by threading the strings through each corner, tying securely at the top and bottom of each side.

2> Slide the sticks through the holes from one side to the other as shown on the box forming a bed for the balls.

3> Drop the balls in from the top of the game.

4> You are now ready to play. The object of the game is to try and remove the sticks by sliding them out of the holes without the balls dropping. Players take turns to remove one stick at a time. If any balls fall after the player has removed their stick this player collects and keeps these balls. The player with the least balls when finished is the Winner!! Good luck.
